

32nd Signal Bn. RWI Radios, 7th Floor Farben Building in Frankfurt, ca.1966.
 The second two photos when placed next to each other at a 90° angle pretty much give a true perspective of the radio room. The commercial equipment was Collins 558-30 with Single Side Band. Under the maps on the window ledge are our coffee, cream and sugar. Protocol required for security purposes that there always be a non-com in the room. Notice our always present handsome and very strack E-5 Sgt. Arthur.
